Tensioning Services

Walden Equipment offers the most diversified tensioning and rope changing service to the mining industry today.

Walden Equipment is well recognized as a leader for rope tensioning services throughout North America. Walden Equipment provides tensioning of up to 60,000 lbs. and can handle up to 3.5" diameter rope. Our tensioning specialist can complete all your tensioning requirements from rope installation to cable reeling.

Walden Equipment has both drum tensioners to be used for lower tensioning requirements and our larger multi-groove bull wheel tensioners that are used when high tension is required.

To speak with one of our tensioning experts please call our offices at 1-877-682-2084.

Walden Equipment's tensioners include several multi-groove bull wheel tensioners that are skid mounted for easy of movement in various conditions and applications. They are designed to provide positive control of cable released under tension.
